Keep it crumb clean: do not leave food or litter behind.

Take valuables with you and lock your vehicle.

Private Driveway.
No Access beyond this gate.
No parking along road.

Wildlife Habitat
Schilling Lake is being filled in naturally through the ecological process of succession. A wet meadow will form as plant material decays and natural sediments fill in the pond. Gradually, shrubs and trees will establish, and the meadow will become forested. As the physical and plant community slowly changes, this area will continue to provide important habitat for several sensitive wildlife species.
